Trading CFDs and margin foreign exchange involves a high degree of risk and is not suitable for all investors. Leveraged trading carries the possibility of losses that may exceed your initial investment. You should carefully consider your investment objectives, level of experience, and risk appetite before engaging in trading. You do not own or have rights in the underlying assets. Past performance is not a reliable indicator of future results, and tax laws are subject to change. All information provided on this website is general in nature and does not take into account your personal circumstances. We strongly recommend that you seek independent advice if necessary, and read our legal documents carefully before trading with us.
